PROFESSIONAL SUMMARY

Full-Stack Software Developer (MCA Candidate, MIT WPU Pune) with strong experience in building production-ready web applications using Java, React.js, Node.js, and MySQL. Developed scalable systems supporting 200+ concurrent users with optimized performance (<200ms response time) and implemented secure backend architectures following OWASP best practices. Passionate about problem solving, system design, and building real-world impactful applications.

EDUCATIONS

MIT World Peace University (MIT WPU) Pune	Jul 2025
<i>Master of Computer Applications</i>	<i>CGPA : 7.17 / 10</i>
D.Y. Patil Arts, Commerce and Science College Pune	Jun 2020 - May 2023
<i>Bachelor of Computer Science</i>	<i>CGPA : 8.4 / 10</i>
Kendriya Vidyalaya No. 1, Port Blair Andaman and Nicobar islands	Jun 2018 - May 2020
<i>CBSE Class XII — Science Stream</i>	<i>CGPA : 7.3 / 10</i>

PROJECTS

InternSphere — Full-Stack Internship & Examination Management Platform | 🐙 Github ⚙️ Vercel Jan 2025 - Present
Full-Stack Developer

- Engineered a **role-based internship management platform** for Admin and Student users using **Java Servlets, JSP, and MVC architecture**, incorporating secure session-based authentication and authorization.
- Developed an **anti-cheat examination engine** featuring fullscreen enforcement, real-time tab-switch detection, and automated 2-strike disqualification, maintaining exam integrity for over **200** concurrent users.

Technologies / Tools Used : Java, JSP, Java Servlets, JDBC, MySQL, HTML5, CSS3, JavaScript

TideWave Andaman — Full-Stack Travel & Tourism Web Application Mar 2025 - Present
Full-Stack Developer

- Delivered a production-deployed SPA for a real client using **React.js 19** and **Vite**; built 8 modular sections (hero slider, packages, gallery, testimonials, contact form) serving live end-users.
- Developed a **Node.js/Express.js REST API** with **Nodemailer** email automation (owner notifications + branded customer confirmations) integrated via **Axios**, reducing manual follow-up by **100%**.
- Hardened backend security with **Helmet.js, CORS whitelisting, express-rate-limit, XSS-safe escaping**, and regex-based input validation middleware — following OWASP best practices.

Technologies / Tools Used : React.js 19, Tailwind CSS v4, Framer Motion, Node.js, Express.js 5

Personal Developer Portfolio — Responsive React Web Application Feb 2025 - Present
Full-Stack Developer

- Built a fully responsive SPA using **React.js 19** and **Vite** with 7 reusable components, a custom CSS design system (15+ CSS variables, glassmorphism, gradient CTAs) — zero dependency on external CSS frameworks.
- Integrated **Framer Motion** for scroll-triggered animations and achieved **Lighthouse accessibility score above 90** via semantic HTML5 and ARIA attributes; optimized build pipeline to **433ms** production build time.

Technologies / Tools Used : React.js 19, Vite, Vanilla CSS, Framer Motion, Lucide React

SKILLS

Databases :	MySQL, Supabase
Frameworks & Libraries :	React.js, Node.js, Express.js, Vite, JSP, Java Servlets, JDBC, Tailwind CSS, Framer Motion
Languages :	English, Hindi, Marathi
Programming Languages :	C++, Java, Python, JavaScript
Soft Skills :	Communication, Teamwork, Problem Solving, Adaptability, Time Management, Decision Making
Tools & Platforms :	MySQL, RDBMS

CERTIFICATIONS

Udemy: Completed **Core Java** certification by **Abdul Bari**.
